Onderwerp

The city of The Hague, also known as the city of "Peace, Justice and Security" acknowledges the involvement of IMPEC in the "Picken in de Delta" subsidy program.

IMPEC developed in a creative consortium a monitoring and evaluation project, concentrated on measuring good government performance. Their cooperation with the Republic of South Africa, and especially the Ministry of Monitoring, has been developed in a very constructive and correct way. The deliverables were reached in time and within financial targets.

It is highly important to strengthen and further develop tools for good governance.

That's why we give a very positive recommendation as to IMPEC and we wish them all the best in developing their products in the years to come.

Louis Genet

Programme Director Investments International City The Hague
