

ABOUT DPME

- Department for Planning Monitoring and Evaluation
- Established in 2010 (in the Presidency)
- Add public value trough information/data technology
- Facilitate, influence and support effective planning, monitoring and evaluation of government programmes aimed at improving service delivery, outcomes and impact on society.
- Develop a culture of continuous improvement and sharing of good practice

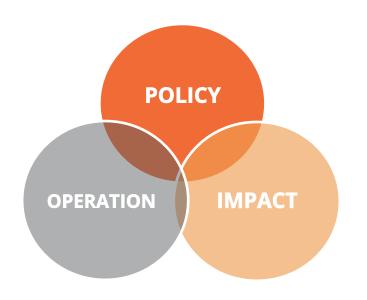

ABOUT IMPEC

- Involved in the South African Presidency since the establishment of the department for Planning Monitoring and Evaluation in 2010
- Assisting the DPME with capacity, methodology and (information) technology including:
 - International study on how to add public value trough information and data (technology)
 - Developed a online platform where civil servants can share good examples of South African government performance
 - Provide with an academic Master Class to train moderators whom are appointed to peer review the evaluation processes
 - Developed an innovative online tool that provides governments with relevant information to improve public value

PUBLIC VALUE FRAMEWORK

LEVEL 1	Non-compliance with legal/ regulatory requirements
LEVEL 2	Partial compliance with legal/ regulatory requirements
LEVEL 3	Full compliance with legal/ regulatory requirements
LEVEL 4	Full compliance and doing things smartly

INFORMATION TECHNOLOGY

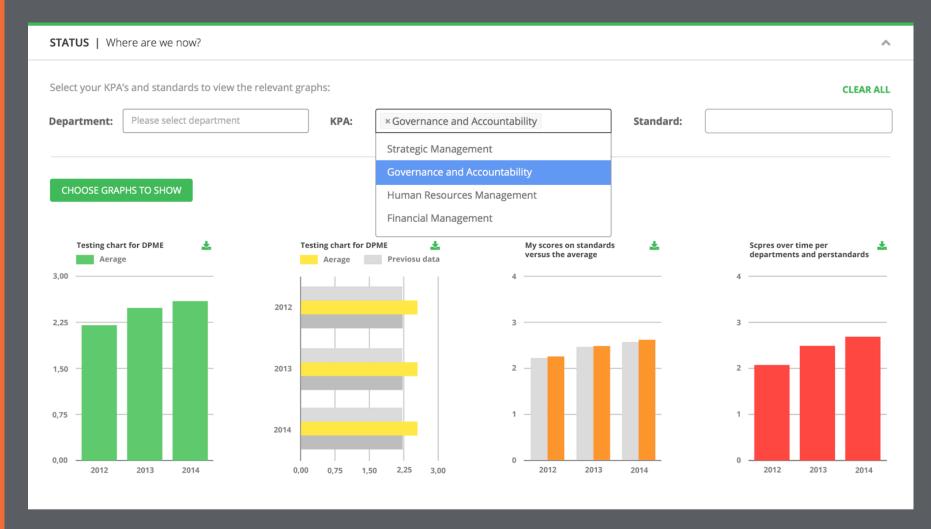

- MKit: Management Knowledge Improvement Tool
- Online tool that provides operational management with relevant content that impacts public value

IMPACT

MPAT 1.4 (Trends): Average score: All KPA's in RSA

FUNCTIONALITIES (1)

- The Mkit is based on the knowledge and expertise from operational professionals of the departments
- The Mkit can be used to improve both compliance as well as the performance
- User identification results in accessing only the relevant content
- Sharing relevant content will encourages mutual synergy

FUNCTIONALITIES (2)

- The Mkit gives 24/7 remote access to policy relevant information and content
- Re-using content/data prevents from reinventing the wheel
- Shared content ownership guarantees the continuity of the operation
- New content can be added without outside expertise

ADDED VALUE USERS

- Policy: operational input for developing new evidence based policy
- Operation: relevant content that improves the organisations compliance and performance
- Impact: evidence based policy and operational excellence results in improved service delivery and therefore impacts public value

APPLICATION

- National governments to improve overall compliance and performance
- Skills development (HRM) program for municipalities
- Management tool for quality control systems (ISO)
- Skill development tool for development programs
- Content management system for Sustainable Development Goals

SPECIFICATIONS

- Saas-Solution
- Open source data
- User-friendly navigation
- Authorisation levels and user roles and permissions
- Completely responsive, adapting layout to device type
- User identification and authorisation is part of security protocol
- Importing data and users from MS, Excel, ODK,
 Survey Monkey
